Talked to Mark Sensibaugh Uinta NF and he said that the forest service was still holding a \$7500 bond on this area. \$5000 for the diggings and \$2500 for the road. As far as he knew the mine had not been recalimed or closed. The file is not under their normal system it was under special use permits( for future reference). Looks like we need to make a visit to the area and maybe write a letter if the inspection proves their is a need.
